DIGGIN MY DOUG

Program Overview for Conservation Coaches

The Douglas County Conservation District is working to increase awareness of conservation and educate the young people in our community about conservation on a broader scale.

ABOUT THE PROGRAM

Diggin My Doug is an educational program for schools that brings focus to kids' deeper connections with our natural environment; **water, air, earth, sunlight** on a basic level.

Diggin My Doug refers to Douglas County and we Dig It! We hope you do too. This program is *FREE* to Douglas County, Colorado Schools. Programs vary per grade level and by the Coach but the theme is always conservation related. We can accommodate Kindergarten through 8th grade. Teachers can book a program by contacting Heather Kelly (contact information is below).

ABOUT OUR CONSERVATION COACHES

For our younger classes, our Conservation Coaches use an interactive approach that includes energetic practices of movement, singing and laughing, quickly taking kids to a place of calm, eager receptivity. This unique system connects children to conservation in intellectual, emotional and intuitive ways. There are other techniques to engage older groups of kids (as you already know!).

All of our Conservation Coaches successfully pass a criminal background check and are passionate about their area of expertise.

Please contact Heather Kelly, to schedule a Diggin My Doug program in your classroom. Content and availability varies and we will do our best to pair you with a Conservation Coach to meet your classroom needs.

Thanks for your interest!
